

Room 1 is a 9 place 0-2 room. We offer a calming, caring and stimulating environment.

Our room offers a variety of different areas and provision to explore. We have a beautiful, calming, sensory area for children to learn and develop using various textured materials, mobiles and different sensory treasure baskets. We offer a range of different small world toys and a hiding den which we use to support the children's interests each month. We follow the EYFS and your child's interests to help further and support their development.

Each month we concentrate on a song and book of the month. We promote and share this with parents and encourage parents to take part with their children at home.

We pride ourselves on our partnership with parents and proactively promote our Family app to keep up to date with your children's daily routine, photos and learning.

We support your child through the earliest stages of their life, supporting their learning and development whilst promoting a safe, secure and stimulating learning environment for all.
